Let's try some Python

OK, here we go - some python and some results. Please note that the output line is generated in Emacs.

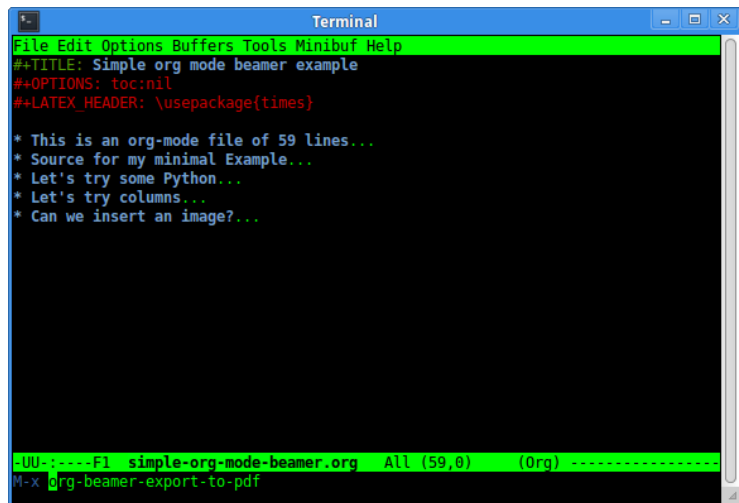

```
def mydata(x):  
    head = ['foo', 'bar', 'baz']  
    d = [1, 2, 3]  
    d[1] = d[-1] + x  
    return [head, d]  
  
print mydata(42)  
  
[['foo', 'bar', 'baz'], [1, 45, 3]]
```

Let's try columns

The source, as always, is Wikipedia.

- ▶ **Left-wing politics** are political positions or activities that accept or support social equality, often in opposition to social hierarchy and social inequality.
- ▶ **Right-wing** politics are political positions or activities that view some forms of social stratification or social inequality as either inevitable, natural, normal, or desirable, typically justifying this position on the basis of natural law or tradition.
