

My Fine Org Mode Table

Per Strandberg

June 17, 2015

1 Org Mode Stuff

- I added a formula after the table: `#+TBLFM:`
 - @ for rows, \$ for columns
 - `@5$2..@5$4=(@2*3+@3)/@4;%.1f::@2$5`
 - `::` is a separator
 - `@5$5=$2+$3+$4;%.1f`
- The command `org-table-iterate-buffer-tables` will recalculate all tables. Other commands recalculates just one row at a time.¹

2 The Table

As we can see the *Dinosaur Project* was a major failure, we recommend continuing with the *Magma Project*. The *Laser Project* should be but on hold until Q1 next year to evaluate future funding.

Table 1: Project overview.

	Laser	Magma	Dinosaur	Total
Red Events	1	0	11	12
Yellow Events	2	4	73	79
Innovation	1.4	2.75	4.3	8.45
Penalty	3.6	1.5	24.7	29.8
